

# Monitoring Numerical Climate Simulations

A Tool for EC-Earth 4

# Some Numbers I

150 years  
~ 65 min/year  
~ 1 week/experiment

# Some Numbers II

150 years  
~ 12 GB/year  
~ 1.8 TB per experiment

# Numerical Climate Simulations are

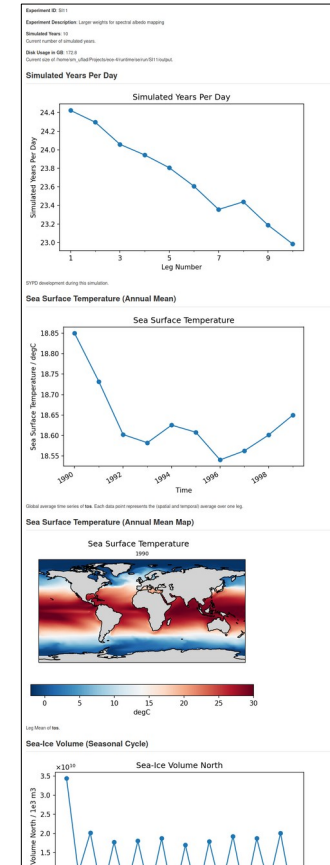

time consuming  
computationally intensive  
data intensive

# → Real-Time Monitoring

# Goal

# Goal

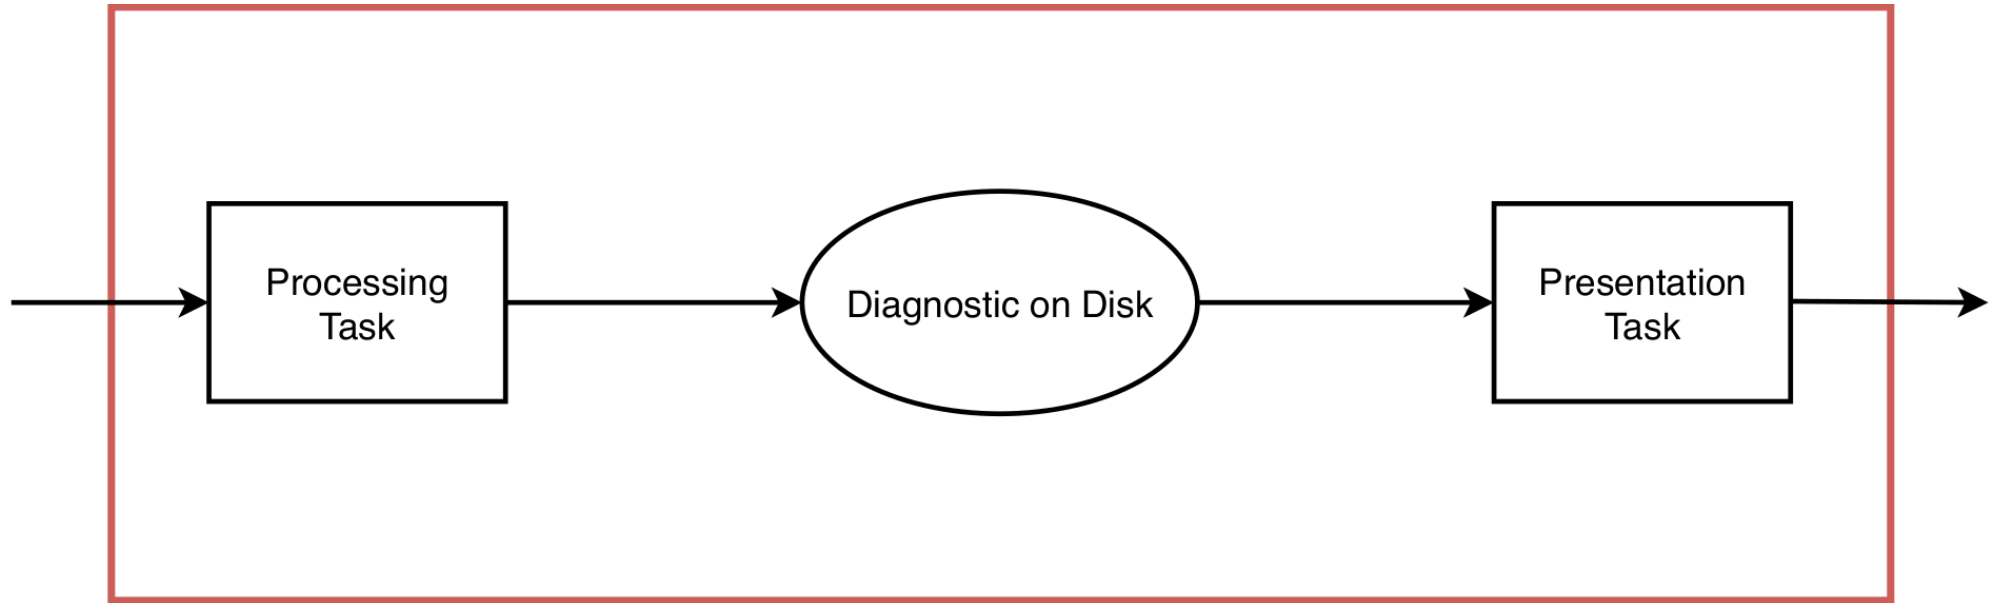

- ... automatically
- ... at runtime
- ... component-agnostic
- ... customizable
- ... extendable

# Concept

# Concept

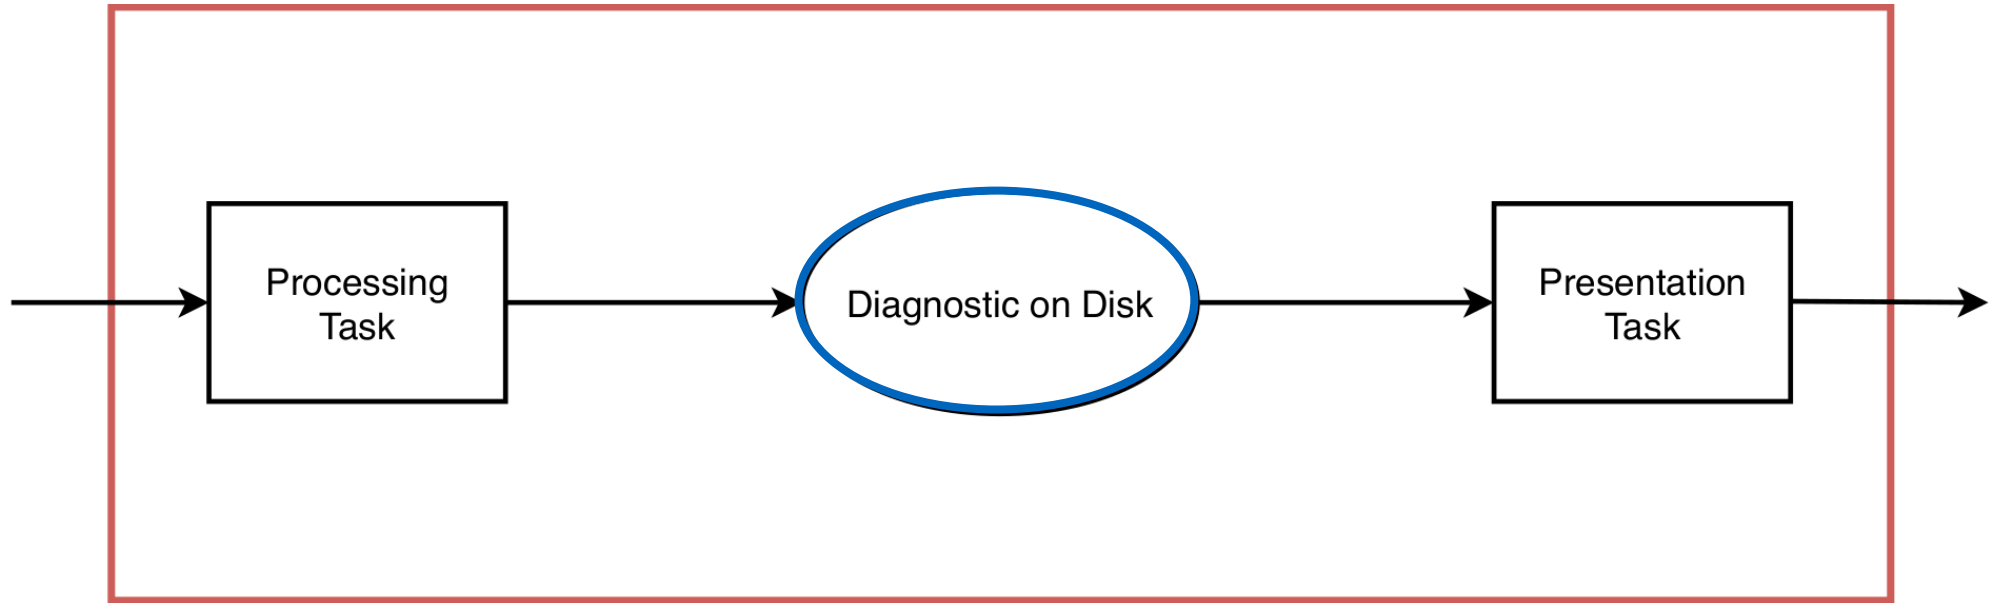

# Goal

... automatically  
... at runtime  
... component-agnostic  
... customizable  
... extendable

# Concept

# Example

## **Processing Task**

annual global mean of oceanic variable

## **Diagnostic**

annual global mean of sea surface temperature  
on disk: NetCDF file

## **Presentation Task**

create Markdown document with all diagnostics

# Implementation

# ScriptEngine

execute YAML scripts  
used to compile & run EC-Earth 4

```
name_of_task:  
| | param_1: 'value'  
| | param_2: 'other value'
```

```
param_1 = 'value'  
param_2 = 'other value'  
name_of_task = NameOfTask(param_1, param_2)  
name_of_task.run()
```

# EC-Earth 4 Monitoring: What

extendable set of ScriptEngine Tasks  
→ users create monitoring scripts  
→ they are executed during runtime

# EC-Earth 4 Monitoring: How

open-source Python code  
automated tests  
user documentation & developing guidelines

# EC-Earth 4 Monitoring: Where

[scriptengine-tasks-ecearth.rtf.d.io](http://scriptengine-tasks-ecearth.rtf.d.io)

Thank You!

Questions?

# Diagnostics (on Disk)

diagnostic types  
file types  
file structure  
(meta)data requirements  
naming scheme

# Diagnostics (on Disk)

scalars – YAML files

time series – NetCDF files

maps – NetCDF files

temporal maps – NetCDF files

# Implementation Examples

# Scalars

- `ece.mon.scalar:`
  - `title:` "Experiment Description"
  - `value:` "{{main.experiment\_description}}"
  - `dst:` "{{main.mondir}}/description\_scalar.yml"
- `ece.mon.simulatedyears_rte_scalar:`
  - `start:` "{{schedule.start}}"
  - `end:` "{{schedule.leg.end}}"
  - `dst:` "{{main.mondir}}/simulatedyears\_rte\_scalar.yml"

# Result: YAML Files

```
title: Experiment Description  
value: A monitoring test with EC-Earth 4  
diagnostic_type: scalar
```

```
title: Simulated Years  
comment: Current number of simulated years.  
value: 25  
diagnostic_type: scalar
```

# Time Series

- `ece.mon.nemo_global_mean_year_mean_timeseries:`
  - `src: "{{oce_t_files}}"`
  - `varname: "tos"`
  - `domain: "{{main.rundir}}/domain_cfg.nc"`
  - `dst: "{{main.mondir}}/tos_nemo_global_mean_year_mean_timeseries.nc"`
- `ece.mon.oifs_global_mean_year_mean_timeseries:`
  - `src: "{{atm_gg_files}}"`
  - `dst: "{{main.mondir}}/2t_oifs_global_mean_year_mean_timeseries.nc"`
  - `grib_code: 167`

# Result: NetCDF Files

```

Experiment #876

## MO10: A monitoring test with EC-Earth4

Added by **Uwe Fladrich** 3 days ago. Updated 22 minutes ago.

Status: **ONGOING**  
Priority: Medium  
Assignee: **Uwe Fladrich**

### Description

Experiment ID: MO10

Experiment Description: A monitoring test with EC-Earth4

Simulated Years: 19

Current number of simulated years.

Disk Usage in GB: 328.4

Current size of /home/sm\_ullad/Projects/ece-4/runtime/se/run/MO10/output.

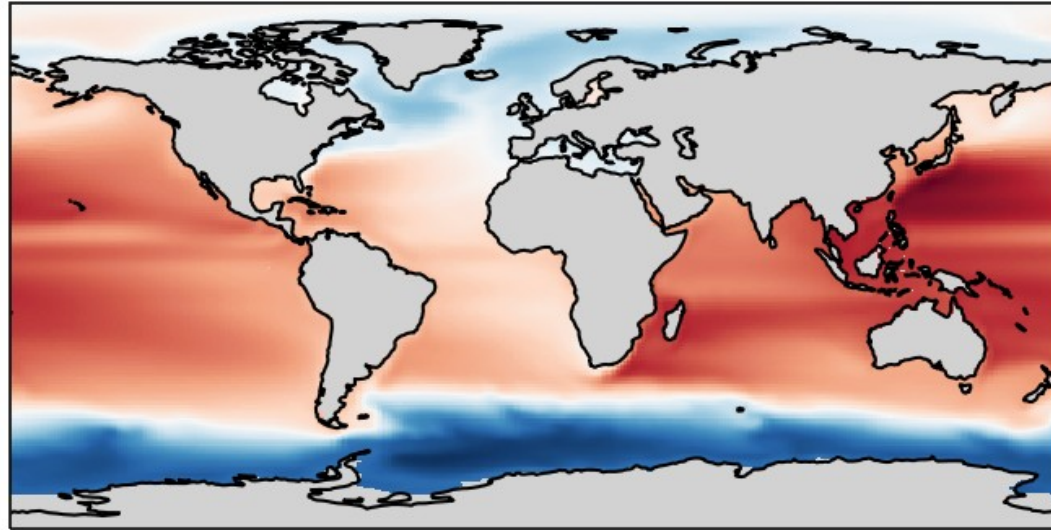

### Simulated Years Per Day

## Sea Surface Height

1990 - 2015

## Sea-Ice Area Fraction North

1990

# Concept

## Processing Task

create a diagnostic & save it

# Concept

## **Presentation Task**

visualize and summarize diagnostic(s)

# Concept

## **Diagnostic**

meaningful quantity about the physical or  
computational performance
